invention relates generally to a three-dimensional (3D)
graphic processing apparatus and a 3D graphic
processing method thereof, and more particularly to a
3D graphic processing apparatus and a 3D graphic
processing method capable of processing input data by a

multi-level data structure and enhancing 3D graphic processing speed. 2. Related Art A 3D graphic processing technique may be classified into a type using a raster image processor (RIP) and a type using a vector graphic processor (VGP). The type using a RIP divides drawing information into units of drawing groups (drawing primitives). The type using a VGP represents drawing information as geometrical geometrical information without using a RIP. FIG. 1 is a diagram illustrating a method of drawing 2D graphic objects on a display screen by using the type of a RIP. As shown in FIG. 1, the type of a RIP represents drawing information as a bit map through a r
